Class Days and Society Reunions-The Conservatory of Music and the Training School-Commencement Day and the Banquet.

THE YPSILANTI HIGH SCHOOL A brilliant audience of pupils, patrons and friends of the High School filled the large chapel hall to overflowing, last Friday night, on the occasion of the graduating exercises of the class of '88. Festoons and wreaths of green, and the class motto

"Persevere and Win"--adorned the room, and the bright faces and cool, white dresses of the young ladies (if anything in such weather might be called cool) made the scene most animating. Alumni and invited guests occupied seats on the platform, with the Faculty and Board of Education, and the graduating class, composed of the following students:

Alex. B. Hardy, Sue Hopkins, Flora B. Miller, Lizzie E. Moore, Blanche E. Mott, Hattie Pattison,

Richard R. Putnam. Watson Snyder, Jr., John H. Thompson, Walter G. Wallace, L. May Webb.

THE STATE NORMAL SCHOOL. STUDENTS' CHRISTIAN ASSOCIATION.

"It is good to be here," the words upon the blackboard at the rooms of the Students' Christian Association last Sunday afternoon, recorded the sentiment which beamed from every face in that large assembly, and was expressed from the lips of all of the speakers. It was the final meeting of the Association for the school year, and the beginning of the anniversary occasions of the Commencement season. Conservatory Hall was crowded. Miss Rogers led the meeting, in which there was prompt and general participation all over the house. Many who spoke were

When we consider what that inspiration is, and what are its fruits, we realize that there is no department of the Normal School more important than the Students' Christian Association, composed entirely of the stu dents themselves and managed exclusively by them, without any agency of the authorities of the school or of the state.

The musical talent of the Normal is justly famous and speaks volumes Miss Miller, in which she remonstrated for the fidelity of Prof. Pease and his assistants in their training. After the usual introductory exercises, Principal Sill addressed the class in eloquent and earnest words which should linger with them through life as an inspiration and a guide in the discharge of responsible duties. They were the words of the true teacher, ject, found in the chemical unknowns the and bespoke a zeal born of conscience and suggestion of the unknowns in the wide tempered by long and successful contact with the great world into which he bade ous watchfulness of undefined springs of the young people of the class to go with action that, often unrecognized, move us courageous hearts and willing service. The specimens of map drawing displayed upon the blackboards of the training school, are remarkable, when we consider that they are done wholly from memory by the pupils of the 6th, 7th and 8th grades. Most adult people, with maps before them, would find difficulty in excelling many of the maps of Europe and South America.

The following are the graduates from the two departments:

The vocal duet and organ solo were encored, and all of the parts were applauded. Mr. Hendershot presided with modest dignity. Miss Robins delivered her salutatory in clear tones and with ready and distinct utterance. The historian, after the usual harmless nonsense, declared that justice to the four-year graduates demands the throwing out of the three-year courses, and closed with a feeling allusion to the death of Miss Nettie Morrison. Mr. Marvin did justice to the grand and

lofty composition that he chose. Mr. Trowbridge eloquently and justly characterized the disgrace and infamy of our war upon Mexico, the greatest national crime in our history, excepting the crime of slavery, of which it was the product.

Miss Otis, like Silas Wegg, had ahabit of dropping into poetry, and with her quaint entertaining. It was more meritorious than the average of its class.

The cooler air that the rain of the afternoon had brought, contributed greatly to the comfort of the audience, and the evening was much enjoyed.

CONSERVATORY OF MUSIC. Tuesday morning occurred the closing exercises of the Conservatory of Music. The extreme length of the program detract Among the vocal numbers, we may especially mention the solos by Misses Champion and Chamberlain, and Becker's

charming "Springtide" by Miss Leda Bellows. Mr. Spalding's fine voice was very effective in "The flower may hide her lovely face," and Miss Mamie Latson red the only encore given for her bear the Summer Birds." Miss Seeger of Ann Arbor sang a delightful Swiss "Echo Song," with unusual grace. The instrumental numbers were nearly double the vocal. Of them Miss Strong's organ solo, and the piano solos of Misses Wilber, Gay, Lee, Dickerson and Green, and Mr. Woodford deserve particular notice. The exercises

fittingly closed with Buck's fine "Hymn to ART DEPARTMENT.

The exhibit presented by Prof. Goodison's classes in drawing is worth seeing. The walls of the large room are covered with specimen drawings, the unaided work of students who twenty weeks ago were beginners. The work of the advanced class would do credit to a school of technology. Prof. Goodison is not only an artist himself, but he knows how to teach drawing, as the progress made by his pupils, attests.

Miss Delia Cook, the class essayist, took 'Dandelions" for her theme. The dandelions grow everywhere—each filling its allotted place-on the wayside, in the meadow, in the sheltered valley, alone on the bleak upland. So is man given his allotted place. First the dandelion is intonation she made her Prophecy highly | brilliant in youth, then it grows gray-a puff of wind and it is gone. Man is the same. But when we say that the dandelion is gone, we mean that its seeds have scattered and found resting places in the earth and the next year will rise as a new crop of dandelions. So man's deeds live after him, and his thoughts are sown far and wide, to come up in many minds.

The Prophecy was read from a bunch of green leaves by Miss Watson and Mr. ed somewhat from its general excellence. Patrick. It was written in Hiawatha metre and abounded in clever things.

At the conclusion of the regular exercises, Mr. D. W. The songs gave hearty pleasure, and the lively glee, The Gypsies, was warmly encored and responded to with the no less lively and decidedly charming "Dinah Do." Following the anthem, prayer was offered by the Rev. Mr. Cheney, and the literary program was opened by Miss Emma C. Dedication services, ministerial ordinations and pastoral installations, corner-stone laying of a church, anniversary of a charitable society will have reasonable space in any secular journal if it have previous notice given. If I have some great injustice done me there is not an editorial or a reportorial room in the United States into which I could not go and get myself set right; and that is true of any well-known Christian man. Already the daily secular press during the course of each week publishes as much religious information and high moral sentiment as does the weekly rengious press. Way, then, does not our glorious Christianity embrace these magnificent opportunities? I have before me a subject of first and last importance: How shall we secure the secular press as a mightier reinforcement to religion and the pulpit?

Our poor relations have written to say that they want to inhale the country air for about three months. Well, if they can live on it, let them come; we can lodge the last of them, as we have plenty of house room.—Smith to him that printing might be suborned into the service of the devil, but afterward he betlought himself that the right use of the art might more than overcome the evil use of it, and so he spared the type and the intelligence of all following ages. But there are many to-day in the depressed mood of Guttenberg with uphitted hammer wanting to pound to pieces the type, who have not reached his better mood in which he saw the art of printing to be the rising sun of the world's illumination. If instead of fighting newspapers we spend the same length of time and the same vehemence in marshaling their help in religious directions, we would be as much wiser as the man who gets consent of the railwaysuperintendent to fasten a car to the end of a railroad train shows better sense than he who runs his wheelbarrow up the track to meet and drive back the row up the track to meet and drive back the Chicago limited express. The silltest thing that a man ever does is to fight a newspaper, for you may have the floor for utterance perhaps one day in the week while the newspaper has the floor every day of the week. Napoleon, though a mighty man, had many aknesses, and one of the weakest thing he ever did was to threaten that if the English newspapers did not stop their adverse criticism of him-elf he would with four hundred thousand bayonets cross the channel for Don't fight newspapers. Attack provokes attack. Better wait until the excitement

blows over and then go in and get justice, for get it you will if you have patience and comsense and equipoise of disposition. It ought to be a mighty sedative that there an enormous amount of common sense in the world, and you will eventually be taken for world, and you will eventually be taken for what you are really worth, and you cannot be puffed up and you cannot be written down, and if you are the enemy of good society that fact will come out, and if you are the friend of good society that fact will be established. I know what I am talking about for I can draw on my own experience. All the respectable newspapers as far as I know are my friends now. But many of you remember the time when I was the most continuously and meanly attacked man in you remember the time when I was the most continuously and meanly attacked man in this country. God gave me grace not to answer back and I kept silence for ten years, and much grace it required. What I said was perverted and twisted into just the opposite of what I did say. My person was matigned and I was presented as a gorgon, and I was maliciously described by persons who never saw me as a monstrosity in body, mind and soul. There were millions of mind and soul. There were millions of people who believed that there was a large sofa in this pulpit, although we never had anything but a chair, and that during the anything but a chair, and that during singing by the congregation I was accustomed to l. e down on that sofa and dangle my feet over the end. Lying New York correspondents for ten years misrepresented our church services, but we waited and people from every neighborhood of Christendom came here to find the magnitude of the falsehoods concerning the church and concerning my-self. A reaction set in, and now we have justice, full justice, more than justice, and as justice, full justice, more than justice, and as much over-praise as once we had under-appreciation, and no man that ever lived was so much indebted to a newspaper press for opportunity to preach the gospel as I am. Young men in the ministry, young men in all professions and occupations, wait. You can afford to wait. Take rough misrepsentation as a Turkish towel to start up your languid circulation, or a system of massage or Swedish movement whose pokes and pulls and twists and thrusts are salutary treatment. There is only one person you need to manage, and that is yourself. Keep your disposition sweet by communion with the Christ, who answered not again, the society of genial people, and walk out in the sunof genial people, and walk out in the sun-shme with your hat off and you will come out all right. And don't join the crowd of people in our day who spend much of their time damning newspapers.

Again, in this effort to secure the secular

press as a mightier reinforcement of religion and the pulpit, let us make it the avenue of religious information. If you put the facts of churches and denominations of Christians only into the columns of religious papers, which do not in this country have an average of more than ten thousand subscribers, what have you done as compared with what you do it you put these facts through the daily papers which have hundreds of thousunds of readers. Every little denomination must have its little organ supported at great expense, when with one-half the outlay a column or half a column of room might he rented in some semi-ompiontent secular. be rented in some semi-omnipotent secular publication, and so the religious information would be sent round and round the world. The world moves so swiftly to-day that news a week old is stale. Give us all the great church facts and all the revival tidings the next morning or the same evening. My advice, often given to friends who propose to start a new paper is: "Don't! Don't! Em-ploy the papers already started." The bigstart a new paper is: "Don't! Don't! Employ the papers already started." The biggest financial hole ever dug in this American continent is the hole in which good people throw their money when they start a newspaper. It is almost as good and as quick a way of getting rid of money as buying steek in a gold wine in Colorade. Not ing stock in a gold mine in Colorado. Not more printing presses but the right use of those already established. All their cylinders, all their steam power, all their pens, all their types, all their editorial chairs and reportorial rooms are available if you would engage them in behaif of civilization and

More than eight hundred thousand people in Brooklyn and less than seventy-five thousand in churches, o that our cities are not so much preached to by ministers of religion as by reporters. Put all journalists into our prayers and sermons. Of all the hundred thousand sermons preached to-day there will not be three preached to journalists, and probably not one. Of all the prayers offered for classes of men innumerable the prayers offered for this most potential class will be so few and rare that they will be thought a preacher's idnosyncrasy. This world will never be brought to God until some revival of religion sweeps over the land and takes into the kingdom of God editors and reporters, compositors, pressmen, and newsporters, compositors, pressmen and newsboys. And if you have not faith enough to pray for that and toil for that, you had better get out of our ranks, and join the other A marked illustration of the truth of that

we can not drive out the Sunday newspaper let us have the Sunday newspaper converted. The fact is that the modera Sunday newspaper is a great improvement on the old Sunday newspaper. What a beastly thing was the Sunday newspaper thirty years ago! It was enough to destroy a man's respectability to leave the tip end of it sticking out of his coat pocket. What editorials! ing out of his coat pocket. What editorials! What advertisements! What pictures! The modern Sunday newspaper is as much an improvement on the old-time Sunday newspaper. improvement on the old-time Sunday newspaper as one hundred is more than twenty-live, in other words, about 75 percent, improvement. Who knows that by prayer and kindly consultation with our literary friends we may have it lifted into a positively religious sheet printed on Saturday and only distributed, like the American Messenger, or the Missionary Journal, or the Sunday-School Advocate, on Sabbath mornings. All things are possible with God, and my faith is up until nothing in the way of religious things are possible with God, and my faith is up until nothing in the way of religious victory would surprise me. All the newspaper printing presses of the earth are going to be the Lord's, and telegraph and telephone and type will yet announce nations born in a day. The first book ever printed was the Bible by Faust and his son-in-law, Schoeffer, in 1460, and that consecration of type to the holy scriptures was a prophecy of the great mission of printing for the evangelization of all the nations. The father of the, American printing press was a clergy. the American printing press was a clergy-man, Rev. Jesse Glover, and that was a prophecy of the religious use that the gospel ministry in this country were to make of the

Again, we shall secure the secular press as a mightier reinforcement of religion and the pulpit by making our religious utterances more interesting and spirited, and then the press will reproduce them. On the way to church some fifteen years ago a journalist said a thing that has kept me ever since thinking. "Are you going to give us any points to-day?" "What do you mean?" I asked. He said: "I mean by that anything that will be striking enough to be remembered." Then I said to myself: What right have we in our pulpits and Sundayschoo's to take the time of people if we have nothing to say that is memorable. David did not have any difficulty in remembering Nathan's thrust: "Thou art the man;" nor Felix in remembering Paul's point-blank utterance on righteousness, temperance, and judgment to come; nor the English king any difficulty in remembering what the court preacher said, when, during the sermon against sin, the preacher threw his handkerchief into the king's pew to indicate whom he meant. The tendency of criticism in the theological seminaries is to file off from our young men all the sharp points and make them too smooth for any kind of execution. What we want, all of us, is more Again, we shall secure the secular pres from our young men all the sharp points and make them too smooth for any kind of execution. What we want, all of us, is more point, less humdrum. If we say the right thing in the right way the press will be glad to echo and re-echo it. Sabbath-school teachers, reformers, young men and old men in the ministry, what we all want if we are to make the printing press an ally in Christian work is that which the reporter speken of suggested—points, snarp points, memof suggested—points, snarp points, memorable points. But if the thing be dead when uttered by living voice, it will be a hundred-fold more dead when it is laid out

hundred-fold more dead when it is laid out in cold type.

Now, as you all have something to do with the newspaper press, either in issuing a paper or in reading it, either as producers or patrons, either as sellers or purchasers of the printed sheet, I propose on this Sabbath morning, June 17, 1888, a treaty to be signed between the church and the printing press, a treat; to be ratified by millions of good people, if we rightly fashion it, a treaty a treat, to be ratined by millions of good people, if we rightly fashion it, a treaty promising that we will help each other in our work of trying to illumine and felicitate the world, we by voice, you by pen, we by speaking only that which is worth printing, you by printing only that which is fit to speak. You help us and we will help you. Side by side be these two potent argueigs. side by side be these two potent agencies mtil the judgment day, when we must both be scrutinized for our work, healthful or blasting. The two worst off men in that day will be the minister of religion and the editor if they wasted their opportunity. Both of us are the engineer of long express trains of influence, and we will run them nto a depot of light or tumble them off the

The Millionaire's Advice.

Yes. A man becomes sadly unreasonable when he becomes a millionaire. Of course arguments that avail in the case of people who have money don't avail with people who haven't. For instance, a millionaire's advice is always sound and good-if you can take it. But a millionaire's advice is generally based upon the assumption that you can take it; and it is always the kind of advice you can't take.

The Fastest Train in the World. Most persons who travel on the

Continent of Europe are well aware that the speed of express-trains there is considerably slower than that of English express-trains. "wo or three trains on the Lyons & Marseilles railway come, perhaps, nearest to the English standard of performance. On the Italian lines it is customary to resort to the refinement of having three classes of trains, "ordinaro," "diretto," and "espresso," but there does not seem much to choose between them. The Railway Press corrects our vague impressions by the test of figures, and gives us the exact ratio of our expresses to those of foreign countries. Our English expresses all run at a high rate, but since the acceleration of the Manchester and London expresses one or two of the Great Northern trains carry off the palm. They run at an average of forty-eight miles an hour for the whole journey, including stoppages and the exceedingly heavy bank at Penistone. The bit between Grantham and London is done at the rate of about fifty-four miles an hour. These achievements, however, are up at the cigar factory. - Epoch. closely approached by the other great lines. France and Germany follow with an average of about thirty-six miles an hour. A STRANGE STORY.

That Told by the Captain of a British Steamer.

A strange story, told by Capt. Putt, of the British steamer Talisman, which came around Cape Horn from Liverpool, makes it appear possible that the stories of the sailors may not be all exaggerations, says the San Francisco Examiner.

hard time from the start. We had to do a lot of repairing at the Falkland islands after going through a gale that almost sent her to the bottom.

'From the horn up to the Chilian coast we floundered in a changing gale for two weeks. One day the mate's son, a lad of about 15, was thrown by a lunge of the ship from his seat on a by the way, is a matter of choice wanted the housekeepers. Fashion changes; crosstree into the water.

"The boy was wrapped in a big sou'wester and in consequence could not swim.

A sailor named Banning saw that the boy could not swim wrapped up as he was and leaped into the water after him.

"The sea water in this neighborhood is so cold that a man can not live much longer than twenty-five or thirty minutes in it.

"The attention of every man on anything broken can be readily du-board was given to the two men in plicated. As for nicked dishes,—those the water, but when one sailor raised his eyes and saw an enormous bird make for the boy he emitted a cry of terror, which was joined in by everyone as soon as they saw it.

'It did not resemble a cloud nor did it carry a rock in its talons, but family luncheon. A little forethought it was an enormous creature that no two men would care to battle with un-

der any circumstances. "When Banning raised his eyes and when Bauning raised his eyes and served warm on a cold winter's day saw the bird his first thought was to when the children rush in from school turn around and make for the ship. Fear took possession of him, and his

"It was some time before the boat could be lowered, and by the time it was let down into the water and manned the boy had gone down once. "His sudden disappearance surpr.sed

the bird, which was about to turn its attention to Banning when the boy came to the surface again. I ran to my cabin and returned with a rifle to shoot the bird should it grow ugly.

"When I got on deck the first thing I saw was the strange creature rising into the air with the boy, and its mate, which suddenly appeared, almost as large, was attacking Banning.

"He was on his back, dodging the beak of his adversary and swimming toward the vessel with all his might. I hardly knew what to do. The boy was being carried away and was up thirty of forty feet in the air.

"'Shoot the bird!' yelled the mate, running about the deck like a crazy man and shouting at the top of his voice orders that were not obeyed.

"In shooting I of course ran the risk of killing the boy instead of the big bird, if indeed he was not killed by the fall; but there was not much rising, and after a hasty aim I fired. "It was an excellent shot.

"A wing fell helpless, as if I had broken it, and the bird tumbled down into the water. The second bird, when it saw the boat approach, left Banning and made a fierce attack on one of the boatmen, striking him with its foot a blow that felled him to the bottom of the boat. Another of the crew raised an oar and hit the bird w.th all his might, when it flew away.

"Banning, Gray, and the boy, were picked up. The latter was unconscious, but after a good rubbing he was brought to. Banning was bleeding about the face, and more or less injured about the body.

"The wounded bird fought vic ously when an attempt was made to capture it. It was finally lassoed and taken on board. Three weeks afterwards it died, and it is now at Valparaiso being stuffed.

. The boy said that before he went down he felt himself losing consciousness and grabbed at the enormous bird that was hovering over him. He caught its feet and held on with the grip of a drowning man. He partially regained his sense in the air, but thought he was higher up than he really was and did not dare to let go.

"I have seen many big condors and other large birds," continued the captain, "but never any winged thing as large as this. The stretch of its wings was over fourteen feet. The head and neck were destitute of feathers, and the former, which was much flattened, was skinned and bleeding. It has the big, strong beak of an albatross, and the plumage, though somewhat darker, was not unlike that of the latter bird. Its feet were only partially webbed. During the time we had it on board and until it died it was not seen to eat, but it slept constantly, and it took some rough handling to awaken it."

Luncheon.

To mention the word luncheon is to call up a picture of rest and quiet and homelike peace. Once more the busy wheels of life cease to whirr, and its olden grain of worthless chaff remains indisturbed. The carpenter beside the idle plane, the mason with his brick and mortar, the farmer by his patient orse, the needlewoman raising a veary face from her interminable work, "The ship," said Capt. Putt, "had a all pause for the grateful hour of lunch-

Numberless forms and combinations of color are always to be found, the choice depending upon extent of taste no less than of purse. Every year there is a arger variety, since skilled native orkmen are becoming more skillful still, and our American wares now vie in every respect with the imported and are less expensive. Stamped patterns of the wild rose or daisy or grass or of conventional forms, on ware of a good quality, can be purchased very reasonwith the comforting certainty that horrors for a sensitive eye, a fine piece of china had better be broken and thrown away than be degraded kitchen service. The fitness of things forbids such desecration.

No other meal so well shows the care and thrift of the housekeeper as the provides a savory stew or soup from the bones and remnants of meats and gravies, and stewed fruit and patties. or the old-fashioned baked turnovers asking for something sayory. This is the case where, unfortunately, circumstances compel a late dinner, if the father or other members find it impos-

sible to be home at the mid-day meal. Let the table be ever so perfect, the success of a luncheon depends on the congeniality of the guests. It is essentially a woman's repast. The cup that cheers, loosens thoughts and sets the tongue in motion, and she is not a woman who does not enjoy conversation. The plane of the conversation will be upon the level of her thoughts, but that, thanks to the progress of intellectual and moral culture among women, is yearly taking a higher tone. Those of mightier mold who look down disdainfully on a feminine lunch party would be surprised enough could they listen, unseen, to many a modern talk around the dainty board. Science, thics, philanthrophy, art, and sociology have here found eloquent exposition from those whose lips are sealed in mixed gatherings or when unexhilarated by the contact with those in whose society they feel free from restraint and criticism. - Good Housekeeping.

One of the girls in fashionable society

in New York made up her mind to get married the other day, and after confiding her intention to her father she said: "What do you intend to do for me?" The father was a wealthy man, and thought he was showing a liberal spirit when he answered: "Well, I will give you \$100,000 to buy a house and \$25,000 to furnish it with." "And what will you give me to live on?" the young lady demanded, with a dissatisfied look on her face. "O, I will allow you the interest on another \$102,000," replied her father. "But my chef will cost at least \$1,200 a year. How do you think I can possibly manage with so little?" The father looked slightly grieved, but only said: "That must The father looked slightly do while I am living; you will probably have more when I am gone." Middle Age.

There is not much fun in being a middleaged woman, look at it in any way you like, says a writer for the Toronto Globe. The morning of one's days is fresh and dewy, and there is an ineffable sweetness and mystery in the shades of twilight, but how mercilessly the midday sun lights up the rugged road that is traveled by the middle-aged woman. The rose tints of morning and evening are not for her. She looks at life in a hard common-sense way, and she calls some things by their wrong names. That is to say, she calls sentiment sentimentality, and enthusiasm gush, and love foolishness, and tenderness weakness, and she doesn't seem to be interested in much outside of her home and neighborhood and favorite philanthropic hobby. Her opinion of this mundane existence is summed up in the cheerless words, "Life is a constant

This 1 admit is painting the middle-aged woman at her worst, but in view of the possibility of such a fate overtaking sweet young girls and still sweet older ones, I feel like urging all women who are young, still young, or "getting on," to join with me in an iron-clad resolve never to be middleaged. All in favor of the motion will sig --- Not quite so much enthusiasm, please! No need to stand on the benches and wave both arms. The reason why it is a great mistake ever to be middle-aged is shown in the anecdote told of a so-called elderly gentleman and a thoughtless youth. You are old, Father William," the young man said. "No," replied the other meditatively, "No, I am not old." "Why," said the boy in astonishment, "your face is wrinkled, your back is bent, you walk with a cane, and in fact I know you to be nearly 80." The other glanced at his trembling hands and feeble knees. "My body is old," said he, "but that is only the house that I live in; I am not

The house he lived in! That was all his body was to him, and within its poor decaying wall dwelt a divine occupant dowered with immortal youth. The girlish affectations of some mature matrons deceive no one and are sure to waken pity or contempt in the observer. Instead of affecting the appearance of youth why not retain the spirit of youth, which is full of unselfishness, and gladness, and hope, and lofty endeavor? Crows' feet near the eyes are not to be dreaded so much as a hard, middleaged look in the eyes themselves. Wrinkles about the mouth cannot begin to be as disagreeable as a discontented, middleaged droop in the corners of it, and a faded complexion is a blessing compared with the expressions of a face which conveys no higher intelligence to your mind than that life is a constant chore.

Most Interesting.

By far the most interesting of all Club. the festivities that have taken place of late was that mediaeval dinner party given by M. and Mme. Pierre Loti, at Rochefort. The author of "Les Pecheurs d'Islande" and "Madame Chrysantheme" has fitted up his manvisitor may well imagine himself on the shores of the Bosphorus instead of the Bay of Biscay; a Chinese room, called the "pagoda," full of spoils of the Celestial empire, and a diningroom in the style of the fifteenth century. It was for the inauguration of this marvelous chamber that M. and Mme. Pierre Loti issued invitations some time since to their particular friends in Rochefort and Paris.

The cards, or rather parchment rolls, were printed in old French, and the guests were requested to appear not only in the costume of the times but to adopt the name and attire of some historical personage of the reign of many interesting relics, but none that he to adopt the name and attire of some Louis XI. When dinner was announced the gentlemen offered their hands to the ladies and the procession passed into the dining-room, two musicians, played strange music on their pipes, leading the way. The seats of the host and hostess were placed under two dais, that of M. Loti being constructed so as to accommodate beneath it not only his chair but that of Beatrix of Gif, who was the most honored guest present.

MOXIE is the most remarkable thing ever known. Among all the patent devices and drinks ever set before the public, none have been so popular as the Moxie. Indeed, so large was its sale, there grew to be a general struggle all over the country to nullify its trademark, that all might have the right to use it; but it all ended in favor of the discoverer, Dr. Thompson, of Lowell. Mass. There is now not a place in the United States where it is not on sale. It takes the place of medicine and electricity in paralysis; of stimulants among the drinkers; and of nervines among the nervous, weakly women, with whom it is very popular.

The republican convention has done its Gen. Alger's Michigan friends, who have supported him so zealously and loyally, may feel some degree of disappointment at their failure, but they can have no shade of dissatisfaction with the ticket nominated. They loved not Harrison less, but only Alger more. Gen. Harrison is a strong man in this state, and he is a strong man in the whole country. A brave soldier when the nation had need of soldiers, he discharged his duties in the field with honor and rose through all the grades to the brevet rank of Brigadier General; and when an important political trust was put in his hands, he served with equal fidelity and honor in the national Senate. Irreproachable in private life as in public, he has the love and devotion of the people of his own state to a degree that removes Indiana from the doubtful list, and the confidence of the people at large to a degree that inspires his party throughout the nation with the assurance of success.

Forty-eight years ago, the democrats had unanimously renominated their President, Martin Van Buren of New York, as they have now unanimously renominated their President, Grover Cleveland of New York. The whigs then nominated Gen. William Henry Harrison against the New York democrat, as the republicans have nominated Gen. Benjamin Harrison, the grandson of the other, against the New York democrat now. 'The democrats then thought they were sure of reëlecting Van Buren, as they have proclaimed that they are sure of reëlecting Cleveland now but Gen. Harrison swept the country then, and marched triumphantly to the presidential chair, as Gen. Harrison will do now. That Gen. Harrison was a soldier who had bravely fought the enemies of his country in the field, and had served one term as a Senator in Congress, and this Gen. Harrison has been a soldier and bravely fought the enemies of his country in the field and has served one term as a Senator in Congress. The sign is manifestly right, and the Albany Regency should get out of the way at once.

Levi P. Morton of New York for Vice President. He is a man of irreproachable character and fine abilities, strong in the confidence and regard of his own great state and of the country; and his association upon the ticket is one calculated to insure harmony and united and hearty support in that important state, and to car ry our cause to final victory.

"THE practice of profane swearing," said George Washington, "is a vice so mean and low that no gentleman can ever be guilty of it." These words of the Father of his Country may present a view of the subject that is new to some. That profanity is a vice, is a fact neither new no important to many who practice it. That it is a low vulgarity, making those who indulge in it, objects of loathing and pity to every gentleman, is another view of the matter, not always contemplated, we presume, and which to some might be a mat ter of more concern than the fact of vice. It is not less true, and we commend it to the attention of those to whom it may seem important.

THE Lansing city council has instructed the city attorney to proceed for the suppression of three flash city papers, under the statute against obscene publications The discussion in the council was decided ly healthy. One Alderman, turning around and looking straight at a reporter of one of the papers concerned, ex-ceme tery trustee Ira Crane, said:

I am willing to let the papers and their reporters wallow in their own dirt. Say that, my friend, in your next correspondence. The man who will loan himself to such degredation as this man has been guilty of forgets that he has a wife and mother, and if the latter is in her grave she may well turn over and curse the son to whom she gave birth. If I ever did an act of which I am proud it was to relieve our dead at Mt. Hope of a wretch who is unfit to step into their hallowed resting place, for I did secure that man's removal from the office of cemetery trustee. Take that, too, to the paper that is circulated only among the slums of the lowes classes.

Growth as a Duty, and Its Conditions.

Baccalaureate Address to the Graduating Class of the Michigan State Normal School, delivered Sunday Evening, June 24, 1888, by J. M. B.

As the years move on, occasions like this assume to me a larger importance. see more clearly than once I did that he who assumes to offer to a group of young men and women the last word of caution, advice or encouragement, upon the occa-sion of their changing the narrower life of the school-room for the thronging and multiform activities of real life, carries a real responsibility; and this responsibility lies in the direction of missing a magnifi cent opportunity rather than of making any positive error. There was a time when I would have been content to entertain you with verbal pyrotechnics, or to astonish you with alleged flights of eloquence or with an array of "glittering Indeed, I remember when eneralities." would have been ambitious to do some But I seem to have outgrown such ambitions and I most fervently hope that the seeming corresponds with the I am sure I do not care to talk to you for the sake of talking, nor of hearing myself talk, nor even for the purpose counding out in some perfunctory fashion and in "due and ancient form" the established and conventional proprieties of commencement week. I feel profoundly that you have a right to expect of me earnest words that shall convey serious and fruitful thoughts plainly and convincingly expressed.

I stand before you to-night, hesitatingly and indeed half-reluctant, and this for a

reason given a moment ago, viz: that it is so easy at a time like this to miss a most valuable opportunity. And why is this opportunity an extraordinary one? Let us see. This is the opening day of a week that means great things to you. It means the culmination of many long cherished hopes and bright anticipations. It means in some sense, the fruition of years of laborious yet joyful endeavor. Its notable events will be remembered by you so long as life lasts. Now, it is a law of the soul that impressions made upon it at such time are deep and enduring. Memory links them together with bonds that are ndissoluble and perpetual. They borrow intensity from their intense surroundings They will last. They will persist indef initely. You will be old men and women gray-haired and tottering, before they will be forgotten. Whenever memory shall recall any one of the many cherished happenings of these few memorable days, along with it shall come unbidden, any words which I shall utter to-night, provided they are words which impress you. Of course this persistence in memory will be true only of what in some way makes its mark deeply upon your souls. If the impressions made are feeble, they will fade the more swiftly on account of the The nomination of Gen. Harrison is intensity of synchronous impressions. So admirably supplemented by the choice of if what shall be said to-night lack point or power or fitness, or the over-coming mo-mentum that inheres alone in truth, an hour great with eternal possibilities shall be sadly and wrongfully wasted. Hence the responsibility of which I am deeply onscious; hence the hesitation and th half-reluctance. But I rejoice in the op-portunity, nevertheless. If I am able to say anything of real and lasting value there could be no time more favorable. It is mine to strike while the iron is

At this time of your utmost receptivity at the hour when your minds, alert with the high tension of great interest and wholesome stimulation, can best grasp assimilate, and make permanent whatever fitly presented to them, it is my es teemed privilege to say to you such things as my larger experience of life moves me say, for your benefit and advantage. I value this privilege, and God grant me wisdom to improve it to the uttermost, and to deliver to you his truth, who is the source of all truth, in such a way that every line of association leading out from these marked and eventful days shall, so long as you live, be paths upon which your minds shall return to the words

I purpose to speak to you of the duty of growth and, if time shall allow, of the ecessary conditions of growth.

Inwoven into the very warp and woof of all human life, and especially in the larger life upon whose activities you are about to enter, there are duties to which it is wise to invite your attention. Of these most are plain and unmistakable. Few will fail note them and to acknowledge that the obligations involved in them are sacred and binding upon all. Right-mind-ed men and women will hardly fail to recognize, for instance, the duty of perfect and transparent truthfulness in word and in deed, of thorough honesty in all our intercourse with our fellow-men, of a kindly and liberal charity toward all, of abstention from thoughts and actions that legrade and demoralize the soul, from slanderous and even from censorious words, from hatred and malice and all uncharitableness, and from debasing secret

In a plane of spiritual life a little higher there will be found a general and sincere acknowledgement of the duty and of obedience and love towards God to whom alone we owe life and our capacity for happiness now and hereafter. along with this, recognition of the duty of perfect purity in thought as well as in deed, and of love towards our neighbors and even towards our enemies. Even those who fail most signally in meeting and fulfilling the obligations involved in these obvious duties are prompt to admit that they are binding and cannot be neg-

lected without peril to the soul.

I have already called your attention to a duty whose claims are not so readily admitted and whose binding force is not so freely and fully acknowledged. A lawyer trying Christ once asked him "Which is the great commandment in the law?" and this was his answer: "Thou shalt love the Lord thy God with all thy heart and with all thy soul and with all thy mind. This is the first and great commandment, and the second is like unto it: Thou shalt love thy neighbor as thyself. On these two ommandments hang all the law and the prophets." Here we have, compactly stated, the substance of God's will toward man. "On these two commandments hang all the law and the prophets." But neither these two commandments nor the Decalogue of which they are the terse but com prehensive condensation, touch in open and palpable words the duty which I de sire to urge upon your earnest considera-tion to-night—the duty of growth.

It is a type of other duties not lying upon the scripture texts, nor conspicuously obvious in the letter of its teachings, but which are, nevertheless, fundamental and imperative. It must not be forgotten nor neglected by any whose desires run towards the attainment of genuine manliness or womanliness in all its majestic dignity.

I use the word growth in its broadest and most comprehensive sense. I mean spiritual growth along all the lines indicated by the triune nature of the soul of man. Not growth in its physical aspects, for in the economy of the world that ends with early maturity. Not growth in the direction of knowledge alone, but growth in apology for another, "He erred not Feather Weight, Daisy.

There are doubtless many other brands of alum baking powder beside those so far examined and named by the authorities of the whole soul in understanding, in the answer is ready, "He had no business to be ignorant." "He ought to know better." Another says, "His act was shameties. Most of the baking powders sold in bulk, by weight, and all sold with a gift or present, are said to be of this description. God in whose image he was created, Prof. H. A. Mott, United States Govern- growth in all that is excellent and worthy growth in the power to do and to conquer,

growth in love and charity, in sweetness and in strength and in mastery over every debasing tendency of the soul.

It is not my present attempt to set be fore you spiritual growth as something merely desirable and of great value to you, something needful and essential to your own highest happiness. It is indeed all this, but it is something more and greater: I insist upon it as a duty, urgen and imperative—a duty which has been laid upon you and from which you cannot nonorably or justly escape, a duty which it is recreancy to shirk or neglect. I wish to oppose with the best weapons at my command, the prevailing and enervating idea that continuous growth is a mercapability of the soul, a privilege that one may thankfully and gratefully accept to his own great gain and profit, if it pleases him to do so, but which he may also ignore or neglect at his own option and still be blameless: that whether there be growth or decadence, it is a matter of interest only to the soul that grows or withers. I affirm that it is not a mere option. I insist that it is not a mere privilege to be accepted or rejected at will, but that it is a duty of prime obligation-a duty for whose ful fillment we shall at the last be called to strict account. I would if I could, by the urgency and force of my words, lead ever one of you into such status of mind that year allowed to slip away without positive spiritual advancement, without substantial growth would be to you a year shamefully wasted, a year to be looked back upon with stinging remorse so urgent and bitter that it would secure repentance and reformation. I call your attention to the words o

Christ as quoted above and ask you to read between the lines to find wherein they are suggestive of the topic of this discourse, and to discover to your own minds their logical and reasonable interpretation. I want you to see that neithe God nor man excuses remediable short comings: that it is not enough to say " have done my best," if your best is below the fair measure of your capability to do.

Is he obedient to the two great com-mandments "on which hang all the law

and the prophets," who loves God and his neighbor with a narrow, half-developed, half-starved, scanty, pinched, and inade-quate love? Why, the heart of man is capable of rich, strong, wide-embracing love, love as abundant as the waters of the immeasurable sea and constant as the unchanging pole-star, love that suffereth long and is kind, that envieth not, that seeketh not its own, that vaunteth not itself: love that beareth all things, believeth all things all things, endureth all things love that the fiery-souled apostle declare is greater and more enduring than faitl which is able to move mountains, or hope the eternal anchor of the soul. Instead o such love, shall a man offer somethin weak and changeful, something that ha been choked by tares and thistles and stunted into deformity by his own neglect and then lamely and pusillanimously offer the childish excuse that he has nothing

better to give? Suppose through my own default, through unworthy negligence of the means of growth with which I am lavishly supplied, my love is poor and unfruitful, mea ger in amount and worthless in quality am I excusable because I have nothing more nor better in present possession What was the word of the Master to the unprofitable steward who hid his one talent in the earth and, though he offered to return all that had been given him, nothing being wasted or lost, but without increase, though the means of increase were at his Was it not this awful but deserved hand? sentence "Cast ye the unprofitable servant into outer darkness." "Thou oughtest to into outer darkness." have put my money to the exchangers, and then at my coming I should have received mine own with usury. Take therefore the talent from him and give it unto him which hath ten talents: for unto every one that hath shall be given and he shall have abundance; but from him that hath not

shall be taken even that which he hath What is the meaning of loving with all the heart and mind and soul, if it does not mean to the ultimate limit of the potentiality of the heart, the mind, and the soul which I shall speak, and, returning, gain help, comfort, and renewed courage.

Am I doing what my hands find to do with my whole might, when I have with my whole might, when I have through negligence, of which I ought be profoundly ashamed, allowed my might to degenerate into weakness, into the piti

ful shadow of its capacity We owe service to our fellowmen. The limit of that debt is the limit of our possible capacity for helpfulness. The honor able soul will percieve that it has no right to cheat those to whom such service is due by failure to conserve and augment its

wer in doing. How do right-minded men look upon those who do not live and act up to the limit of their power and possibilities. Not with lenient eyes I assure you. If I seek to pay a debt honestly due, with beggarly ten cents on the dollar, pleading that I am helpless to do more, that I have given all I have, shall I be held blameless if I have sat down idly and made no effort to obtain the means of paying it honestly in full? If food, comfort, clothing and shelter are due from a man to his wife and children and he allows them to go naked and suffe pangs of hunger, will reasonable men ex-case him because he gives them all he has when they know that manful effort on his part would secure comfort and even abundance? If a man habitually meets his fel lows with ill-natured frowns and continu ally offends them with rudeness and boor ish incivility, do we condone the fault be cause the manners which he exhibits are the best he has, when we know that he lives in a civilized community where he could, if he would, learn how to practice the decencies and amenities of life? any one whose opinion is worth the breatl expended in expressing it, believe that laziness or ignorance that might be remedied is a good excuse for inefficiency and blundering incapacity? Does the law excuse the fool who takes life in festive sport and then whines that "he didn't know was loaded?" An architect undertakes the designing and construction of a great edifice. The limit of the strength of materials is ascertainable. Patient investiga tion and conscientious experimentation will discover it to any man who ought to put his hand to such a work. But this architect lacks adequate knowledge and skill. His conceit outweighs his merits He has neglected his opportunities. He has failed to train himself with sufficient thoroughness in the details of his art. He piles a grand superstructure upon an insufficient support. By and by comes the inevitable catastrophe. Instead of a palace there is a wreck. Is he blameless because he builded as well as he knew to the cause he Shall he escape bitter condemnation be cause he used the utmost knowledge at his present command, and did the best he knew how to do in planning and constructing? No, men will say "Better knowledge was obtainable and he did not obtain it." "He might have made himself able to de And the condemnation is jus though he meant no harm and though he wrought to the outside limit of the knowl

edge in his possession. Observe how the feeling that men ought to be held responsible to the extent what they might be, as well as of what they actually are, has brought itself into with swiftness, courage and ef-I mean growth in all that ful and wicked, but he is not to blame, he is naturally deprayed." But the common sense of mankind is intolerant of such an excuse. It answers, "Why has he not made himself better? He could, if he

Nothing perhaps so strongly character izes this century as the advance man is making in exploring, understanding and obtaining a mastery could scarcely proceed in a more instructive way than by tracing its stages in the instances we have considered. The Alps and the two 1sth muses illustrate it in a not unfitting way It is safe, probably, to say that the power to excavate earth, to excavate and blast rock is from five to ten times as great as when a man wholly unknown to fame lands with a handful of his countrymen where the city Port Said now stands and begins the excavation of Suez.

In regard to the present enterprise upon the American Isthmus, if we take into account its magnitude and the diffi-culties involved, it represents without doubt the greatest effort in the line of industry and peaceful achievement man has yet put forth. De Molinari, the Bel-gian economist, computed that the stock of machinery for the excavation repre-cepted the labor of half a million men sented the labor of half a million men. The Man About Town.

Said a young lady: "We never know

the men we meet in society,"
"Why?" I asked her.
"Because they won't let us," was the reply, and then she delivered a short but eloquent discourse on the manner of in tercourse between young ladies and gen-tlemen who revolve in the fashionable world. She rallied the reasons for the above sweeping statement around the pivotial point that men are artificial when they meet women beneath the glare of chandeliers and among the subtle influences of the drawing-room or dancing-hall. "It seems to me that when the average young man dons his evening toilet he discards his identity and assumes a sphinx-like role. It must be that he deems this suppression of his originality the attitude in which women will best like him, but I assure that a will best like him, but I assure that a lady of intelligence does not appreciate this absence of personality in the men she meets. We don't really like to see men whom perforce we must at some time from the force of circumstances se-lect for our husbands surrounded by an artificiality which forbids our accurate knowledge of their characteristics.

Great applause greeted the announcement of Mr. Morton's selection. His nomination was made unanimous by a work is now all completed, it will proceed at once to balloting.

All routine matters having been disposed of, Mr. Boutelle, of Maine, arose with the closing sensation of the convention. He said:

Who knows what his reply would have been had he been offered the choice between the recovery of his daughter and the accomplishment of his vengance. What a frightful debate might have occurred between his rancor and his tenderness.

But Maud was lost. There remained nothing but to punish, The Marquis turned sharply toward Stenio and appeared to demand if he had anything more to say. The musician was motionless, overwhelmed. Then, going to the door, the Marquis opened it and

"I think that you may go. In an as I do not desire to live in the same city with you I inform you that this evening I shall start for England." Marackzy bowed without a word and departed.

The Marquis heard the noise of his steps on the staircase, then on the When the sound had ceased he drew a deep sigh, and seeing Kitty, who had run in anxious to hear the result of this terrible interview, he held out his arms, pressed her to his bosom and hurst into tears.

VI.

The sight of her father seemed to revive Maud. She regained some of her lost strength, surmounted the horrible gloom that beset her and became cheerful. She could rise and take the few steps to the window. There she passed delicious hours warmed by the balmy light of the sun, caressed by the vivifying breeze of the sea, and diverted by the joyous movement on the

He saw her, momentarily exalted by an unhoped-for joy, battling against the feebleness of her body. But he knew that the contest would not be victorious, and this fictitious energy ceasing that poor Maud would fall again like a wounded bird.

He watched with a stricken heart this revolt of youth so strongly attached to life, and believing still that it was only a slender thread that retained her, he cursed the days that flowed away so rapidly, full of anguish at thoughts of a to-morrow that might bring misfortune.

As he had said, Lord Mellivan had left for England, but Daisy and Harriet had remained behind.

The constant presence of these two women contributed to maintain Maud so changed?' in this moral well-being, so new for her that it seemed to bring her health. Every morning the young girl came with her governess, and the house brightened with her presence. She went and came, sang, interrupted herself to kiss her sister, and diffused

around her the ineffable charm of her vouth and gayety. Maud, silent, looked at her, and it seemed as if all that she had suffered

was only a painful dream. Nothing of all that troubled her life was true. Mr. Bowser's Trouble With Shirts. When Mr. Bowser was courting me, I, girl-like, never noticed whether his shirt bosoms were white or black, or whether his collars were turned down -If all the Charlotte people were to die at the ends or stood stiffly under his eyes, and was in love with the shape of his head, and that was all sufficient. I supposed he wore clothes, and I supposed he had shirts and collars, but as to who made them, what they cost or how they set was a mystery I never sought to solve. Mother had her eye on that young man, however. After looking him over two or three times she said to me:

"Sarah, if you marry him you'll have trouble—lots of trouble." "Why, mother?"

"There's no why about it. He's too particular with his shirts and collars. If they don't set just so, he's as uneasy as a fish out of water. I cured your father and in the course of ten years got him so that he would ride out for a collar, but you can never cure this chap."

"But I can make shirts and collars, and you know how nicely I iron."

"Oh, well, we shall see. I don't like the end of his nose and that sneer on slips. The sight that met her gaze his lip, but I shan't oppose a marriage. When he begins to jaw and tear around, you just remember what I said."

I had forgotten all about it long enough before the wedding, but two happened?" asked the frightened madweeks after that event Mr. Bowser am. himself called my attention to it. We had just got home from our wedding tour when one morning as he was putting on his collar he blurted out:

"I'd like to know what in tin and rosin ails this infernal thing!"

"Mr. Bowser!" "And this confounded shirt sets as if it was made to go over a clotheshorse! It's a wonder to me I haven't killed somebody before this!"

"Do you have trouble with your shirts and collars?" "Do I! Don't I! There isn't a

I finished and planning to give Mr. Bowser a surmy eyes were fairly open he shook something at me over the foot-board

and exclaimed: "That's the kind of a housekeeper you are, is it! What's this flour-sack and dog-collar doing in my shirtdrawer?"

"Flour-sack? Dog-collar?" I re-

peated. "Certainly! Here I've fooled away half an hour of my time supposing it was a shirt and a collar. Mrs. Bowser, when April fool day comes I shan't mind a little joke, but this is the twen-

ty-third of January." "And that shirt doesn't fit?" "It might fit a telegraph pole or a convict !

"And the collar is-is-!" "Is a good fit for a pirate or some one else who wants choking!" 1 cried. I sobbed. I boo-hooed. just made a business of going all to

it. When he had gone mother came in, saw the rumpled shirt and collars on the floor and quietly observed: "I wasn't mistaken, you see. If ever

a man needed cow-hiding, it's this husband of yours." There has never been a change of linen on Mr. Bowser's part since then that he hasn't gone through a set programme. He pulls from four to six shirts out of a drawer, tumbles them over each other several times, selects one with a grab, and he gets into it about the way a man would climb out

of a well. As soon as it is half on he yells: "Mrs. Bowser, where are you?"

"Here, dear." "Well, what in thunder ails this old shirt?"

"Is anything wrong with it?" "Wrong! Why, I'd give a million dollars to be locked in a room with the man who made it for three minutes! It's-it's-!"

He's got into it by that time, and then it's pull here and haul there, and twist his neck this way and that, and he couldn't be more tired if he had been sawing wood. Then comes the collar. He tries at least four before he gets any sort of fit, and after he gets it on its too stiff, too limber, too long, too short, too high, or too low. He's a peaceful man, he says, and he has been did not need to be told when to drop brought up to respect the law, but if he ever meets the maker of that collar | put corn in the shock. blood must flow in buckets. He's mad all the morning, and mad at breakfast, and mad when he goes away, and I suppose it takes him half the forenoon to get his placidity back.

After awhile I made up three more shirts and six more collars, brought them home one day as a store package, and asked him to try them as something new. "Say! you've hit it at last!" he said

next day when he put one on. "Do they fit?" "Splendidly." For two or three days he was at rest,

then, like a goose, I had to brag that I made the articles, "You-you did!" he grasped.

"Of course." "And deliberately decieved me." "Was it deceit?"

"Mrs. Bowser, a wife who will do that will pioson her husband! Don't speak to me again this week!"

He wore 'em all out, but from that hour he has never had one to fit. Detroit Free Press.

"Coon" vs. Cowslips.

A lady up on Prospect avenue, is passionately fond of cowslip greens, and has been looking forward all winter to the return of the balmy days of spring, that she might sally forth and cull the seductive cowslip. The balmy day's failing to balm she was about to give up all idea of tasting her favorite dish, when chance steered her on to a party in the person of her colored washerwoman, who agreed to bring her some the next morning.

The washerwoman said that she knew of "a marsh whut wus jes' dead valler wif dem cowslips," and agreed to bring a basketful for half a dollar. The lady was in high glee, but hour on Sunday with one of my stockings after hour passed with no signs of the dusky maiden. This is the day when the 'hired man" who is engaged to work on a farm for the season reports for duty, provided, of course, that there is somewhere a farm on which such a relic of a by-gone age as the hired man is to be found this year. What an institution he used to be in the days when we were young! A thoroughbred Yankee; not not a drop of imported blood in his veins; strong and lithe, and actitive and tireless, intelligent, fairly well educated, skilled in his business, and, as a rule, industrious beyond the belief of this ten-hour gen-

eration.

From the time he drove his ax into the woodpile in the door yard on the 1st of April until the close of the season, after harvesting, he expected to work, and he did work, not from sun to sun, but from dawn to darkness, and then did the milking and fed the pigs afterward. His day was fourteen, fifteen, even sixteen hours long, and it never occurred to him that it should be shorter. He was no specialist. He could do anything. He was smart with the cythe, handy with a hoe, cute with a cradle and experienced with an ax. He knew how much grain and grass seed were required to the acre. when grass was fit to cut, and when it was haved enough to "go in," and he turnip seed in the corn field, or how to He could build wall, make cider,

THE DEADLY TOY PISTOL.-We supposed everybody knew the dangerous character of the toy pistol that explodes aper caps, and would forbid it to their children; but we saw two little boys amusing themselves with one on the street, a day or two ago, and if one of them should get an atom of the burning fulminate upon his hand, and die in the agonies of lock-jaw, it would be no more than has happened to hundreds of other boys in the last few years. Those apparently harmless little toys are as dangerous as rattlesnakes, and their bite is quite as fatal. It is strange that anybody can yet be ignorant of it or indifferent to it.

P. S.-We are advised that there are caps now sold that are harmless. hope so, and hope these were those.

IMPORTED AND DOMESTIC.

We are now prepared to make prices that defy competition. We have no traveling agents. We found by experience they were expensive attachments, and have concluded to give our customers the discounts saved by this change. If you will come to the works we will convince you of this

No establishment in this section can compete with us, for we have more stock finished ready for engraving than any three concerns in the state. You will readily see why we can undersell them.
